

ASSET MANAGEMENT

Warehouse Services Inc. is a fully integrated supply chain company with the capacity to offer complete end-to-end supply chain solutions.

We are proud of our ability to assist clients with site selection, facility design and layout by using our in-house engineering group. Should our clients request that we own the facilities, we are more than happy to comply. Our financial team is skilled at understanding today's stringent accounting requirements and will work to develop services that meet your financial needs.

Warehouse Services Inc. offers a full service, multidisciplinary, customer-oriented engineering firm specializing in private development and public infrastructure.

From conceptual site design to project completion, we are dedicated to providing high quality service and timely solutions. We offer a wealth of experience in both the public and private sectors, specializing in projects across the Midwest and supporting projects throughout North America.

As a full service engineering company, Project Management is one of the areas of expertise we provide. We can execute your project from initial design through construction, thus ensuring the efficient and proper completion of the project. Construction management is a specialized service offered within the Project Management group. Other areas include: process engineering and design, process improvement through time and motion studies and Six Sigma analytical studies. We also maintain a fully staffed industrial engineering team available for extended on-site process improvement programs, Lean, 5S, employee training, and management programs.
